Hands and arms: image request

Images only. Make rendered pictures of a pair of gloved hands and short sleeves. A developer builds the 3D model from your pictures, so do not make a 3D file.

1. What it is

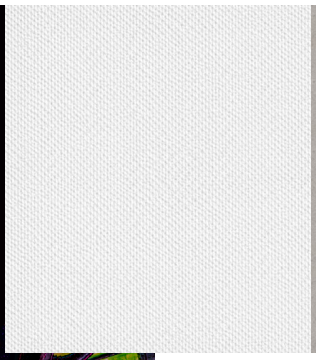

The player's hands in the VR arcade. Style of the game **Zero Caliber 2**: believable tactical gloves with rubber knuckle guards and a short sleeve cuff. Right now they look creepy and are angled about 90 degrees off. They must look natural when gripping a joystick and pressing buttons. Dark olive or black glove, one consistent material.

Real size: **an average adult hand, about 0.19 m from wrist to fingertip, with a forearm sleeve about 0.2 m long**. Keep these proportions in every view.

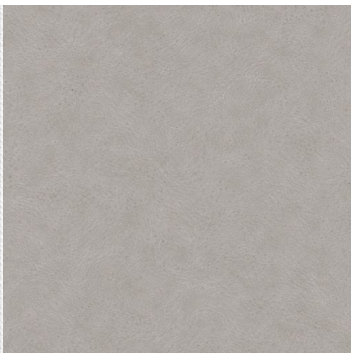

2. What exists now (for style and shape)

Today at the machine: the dark shapes at the sides are the current hands.

Current glove texture (512 px, low-res weak).

Current skin texture.

Mood: dark, moody, realistic early-1990s arcade. Real materials with real reflections. No flat clip-art, no word-art lettering, no cheap frames.

3. Images to produce (10 images)

For the build views: perfectly flat orthographic camera (no perspective, no tilt), plain pure black background, even soft light with no strong shadows and no floor, the object fills the frame with the same margin, and every build view uses the **same scale** so they line up. Output 2048 px on the longest side. Crisp edges, no glow haze or bloom beyond the edge.

#	Image	Exact specification
1	RIGHT HAND open, back of hand	Orthographic, fingers pointing up, flat open hand, back of the glove toward the camera. Include the sleeve to the elbow end.
2	RIGHT HAND open, palm	Same hand turned over, palm toward camera.
3	RIGHT HAND open, side	Orthographic from the thumb side, exactly 90 degrees.
4	RIGHT HAND open, top	Orthographic, looking straight down on the back of the hand with fingers pointing away.
5	RIGHT HAND gripping a joystick	Perspective, shown from the side. Fingers wrapped round a ball-topped stick about 3 cm wide.
6	RIGHT HAND pointing	Perspective, index finger extended, other fingers curled, as if pressing a button.
7	RIGHT HAND fist	Perspective, closed fist, back of hand.
8	RIGHT HAND on controller	Perspective, hand holding a modern VR controller, the way a person holds one.
9	GLOVE texture sheet	One flat image: the glove material laid out, with knuckle guards, stitching, cuff and fingertip pads. Seamless fabric swatch beside it.
10	LEFT HAND	Same as image 1, but the left hand (mirror is fine).

For the orthographic hand views (1 to 4) use the same scale and camera distance. The wrist and cuff must line up between views.

4. Prompt to paste into Copilot

```
Make a set of rendered images of a single gloved hand and short sleeve for a VR game. Style of Zero Caliber 2: tactical glove, rubber knuckle guards, short sleeve cuff, dark olive or black, one consistent shaded material. The hand is an average adult hand, 0.19 m wrist to fingertip, with a 0.2 m sleeve. Look at the attached pictures for the current (poor) hands. Produce the 10 images listed in the attached brief. Images 1 to 4 must be flat orthographic (no perspective), on pure black, even soft light, same scale, 2048 px on the long side, crisp edges. Each image is a separate file. Realistic rendering, natural hand shape, not creepy, no clip-art.
```
