Pinball machine: image request

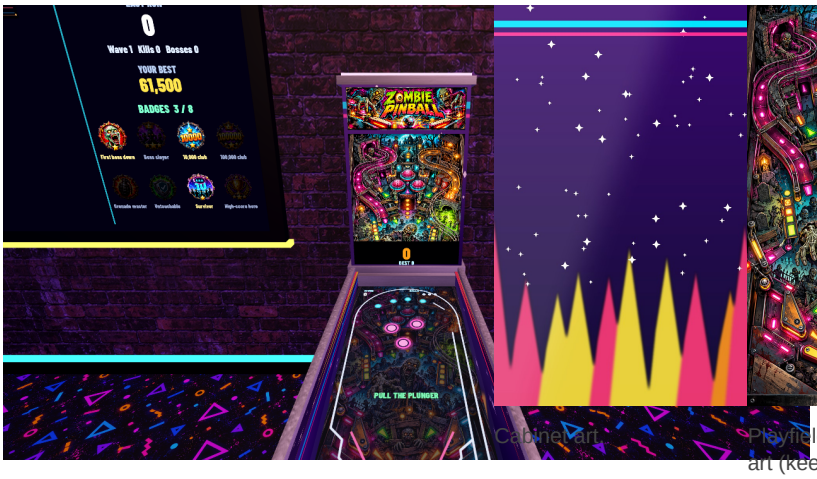

Images only. Make rendered pictures of a zombie pinball machine. A developer builds the 3D model from your pictures, so do not make a 3D file.

1. What it is

A full-size 1990s pinball machine called ZOMBIE PINBALL. Slanted glass playfield, a tall backbox with a marquee, painted side art, chrome legs and lockdown bar, flipper buttons on both sides, a plunger on the right, and a red RESET button on the front.

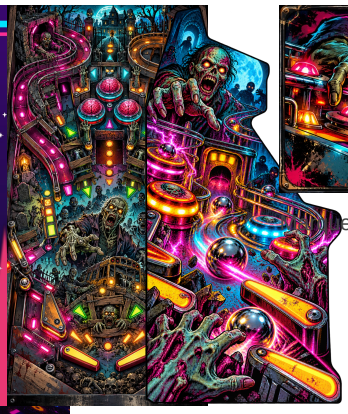

Real size: **0.6 m wide, 1.45 m long, 1.95 m tall at the backbox, playfield tilted about 6.5 degrees toward the player**. Keep these proportions in every view.

2. What exists now (for style and shape)

Today in the room.

Cabinet art.

Playfield art (keep it).

ee art.

Side art.

Mood: dark, moody, realistic early-1990s arcade. Real materials with real reflections. No flat clip-art, no word-art lettering, no cheap frames.

3. Images to produce (10 images)

For the build views: perfectly flat orthographic camera (no perspective, no tilt), plain pure black background, even soft light with no strong shadows and no floor, the object fills the frame with the same margin, and every build view uses the **same scale** so they line up. Output 2048 px on the longest side. Crisp edges, no glow haze or bloom beyond the edge.

#	Image	Exact specification
1	FRONT (player's end), straight on	Shows the lockdown bar, flipper buttons either side, coin door, RESET button, legs, and the backbox above.
2	SIDE, straight on	Exactly 90 degrees. The true slope of the playfield and the shape of the backbox. Most important.
3	BACK, straight on	Backbox back and rear of the cabinet.
4	TOP, straight down	Playfield seen from above, glass on.
5	THREE-QUARTER front left	Normal perspective at eye height, dark brick wall behind.
6	THREE-QUARTER front right	Same from the right.
7	CLOSE-UP backbox	The marquee and score display area.
8	CLOSE-UP player end	Lockdown bar, flipper buttons, plunger, coin door, red RESET button.
9	CLOSE-UP legs and base	Chrome leg, leg leveller, side rail, cabinet corner.
10	MATERIALS sheet	Six seamless square swatches: chrome, black cabinet paint, glass, red plastic, rubber, steel rail.

Keep the existing playfield and marquee artwork. Paint the cabinet around them; do not redraw the playfield.

4. Prompt to paste into Copilot

```
Make a set of rendered images of a full-size 1990s zombie-themed pinball machine for a dark, moody arcade. Real size 0.6 m wide, 1.45 m long, 1.95 m tall at the backbox, playfield tilted 6.5 degrees. Slanted glass, backbox with marquee, painted side art, chrome legs and lockdown bar, flipper buttons, plunger on the right, and a red RESET button on the front. Use the attached artwork for the playfield, marquee and sides. Produce the 10 images listed in the attached brief. The first four must be flat orthographic (no perspective), on pure black, even soft light, same scale, 2048 px, crisp edges and no glow haze. Each image is a separate file. Realistic rendering, no clip-art, no word-art text.
```
