Vending machine: image request

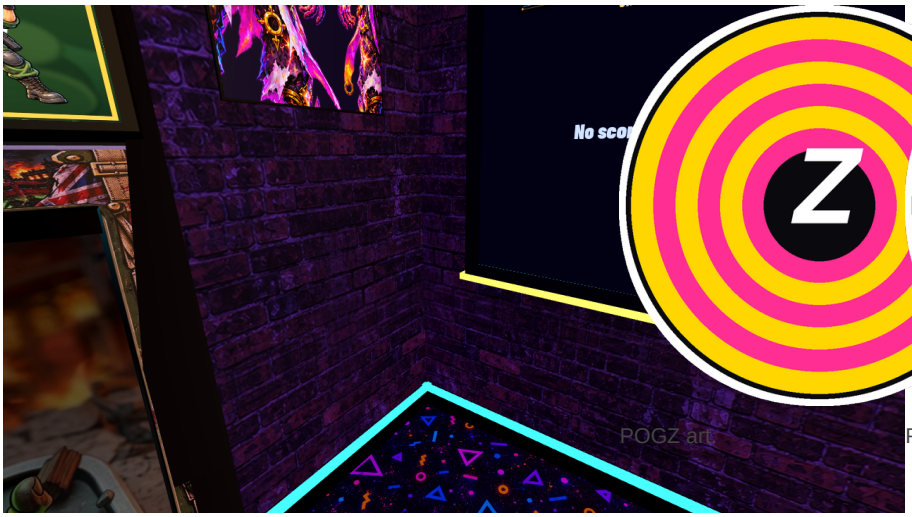

Images only. Make rendered pictures of a snack and soda vending machine. A developer builds the 3D model from your pictures, so do not make a 3D file.

1. What it is

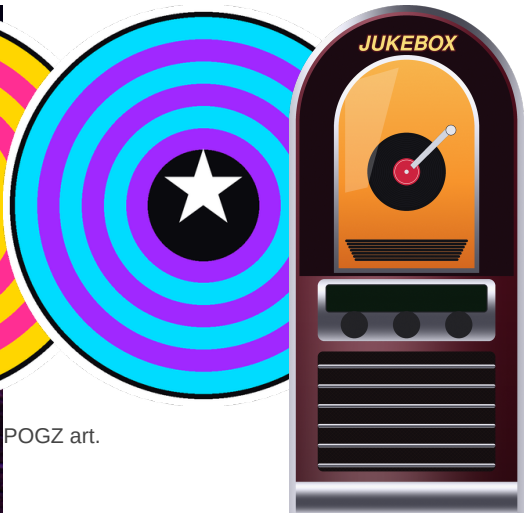

A classic glass-front snack and soda vending machine for a dark early-1990s arcade, standing by the door. Chrome-trimmed, glowing from within, with lit rows of snacks, a coin slot and keypad, and a dispensing flap and tray at the bottom. It sells zombie-themed snacks: Salty Brains, Cheesy Claws, BBQ Bones, Choc Rot, and **POGZ** (collectible discs in bright foil packs).

Real size: **0.84 m wide, 1.95 m tall, 0.85 m deep**. Keep these proportions in every view.

2. What exists now (for style and shape)

Today in the room (a plain box).

Style cousin: the jukebox's chrome and neon.

POGZ art.

Mood: dark, moody, realistic early-1990s arcade. Real materials with real reflections. No flat clip-art, no word-art lettering, no cheap frames.

3. Images to produce (11 images)

For the build views: perfectly flat orthographic camera (no perspective, no tilt), plain pure black background, even soft light with no strong shadows and no floor, the object fills the frame with the same margin, and every build view uses the **same scale** so they line up. Output 2048 px on the longest side. Crisp edges, no glow haze or bloom beyond the edge.
